SUMMARY

Full stack developer with 7 years of experience building high-traffic web platforms with TypeScript, React, Node.js and PostgreSQL. Led a team of 4 engineers, moved a monolith to microservices on Kubernetes and cut page load time by 45%.

EXPERIENCE

Senior Full Stack Developer — Digikala-style e-commerce company (8M monthly users) 2021 - Present

- Built the checkout and payments services in Node.js (NestJS) and PostgreSQL, handling 20k orders/day.
- Migrated the frontend to React + Next.js with server-side rendering; Core Web Vitals improved 45%.
- Introduced Docker, Kubernetes and GitHub Actions CI/CD; deploy time went from 1 hour to 8 minutes.
- Mentored 4 developers and ran code reviews.

Full Stack Developer — Fintech startup 2018 - 2021

- Developed REST and GraphQL APIs with Node.js and Redis caching.
- Built the admin dashboard in React and Redux; wrote unit tests with Jest.
- Worked with AWS (EC2, S3, Lambda) and MongoDB.
